antioxidant

Microhydrin® offers abundantly available antioxidant power. The key is the freely available electrons that quench free radicals. Microhydrin has trillions of available electrons. In fact, no antioxidant on the market has more available electrons than Microhydrin.

It helps create energy, enhance endurance and speed recovery.

**More available electrons = more protection from free radical damage.**

**You can:**

- Experience genuine energy without stimulants
- Have more endurance for your workout or your busy day
- Speed your recovery time and reduce soreness

**With Microhydrin!**

**STRONG SCIENTIFIC EVIDENCE**

Microhydrin® research shows:

- Enhancement of the body's natural energy production
- Powerful antioxidant properties
- Effectively alkalizes the body
- Improves blood oxygen levels
- Increases cellular hydration
- Reduces lactic acid during exercise

**Speeds Recovery**

Microhydrin brings oxygen into the cells and reduces the lactic acid produced during exercise. This reduces sore muscles and speeds recovery time.

Subjects who took Microhydrin experienced a significant decrease in lactic acid levels after exercise as compared to those taking a placebo. This reduction leads to a decrease in muscle soreness and speeds recovery time after exercise.

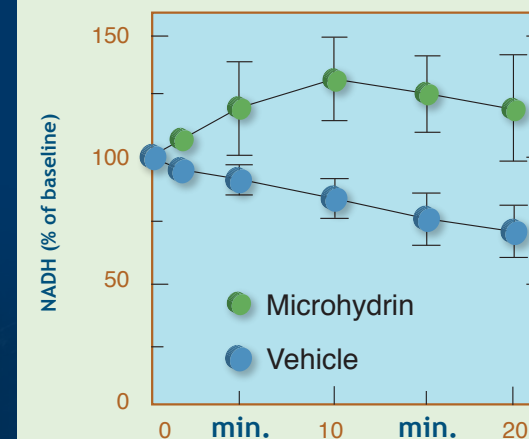

**Millions of bottles have been sold!**

**Increases Cellular Energy**

Utilizing nanotechnology, Microhydrin provides the highest number of electrons of any antioxidant available. We call it Cell HealthFood™ because it is exactly what your cells need to ensure optimal health.

Microhydrin enhances the process of generating ATP, which is the body's main source of energy.

Microhydrin Enhances Mitochondrial NADH

Microhydrin adds hydrogen to NAD (a coenzyme found within all our cells) to create NADH, a precursor to energy production. This leads to the creation of ATP, which generates energy within the cell.

*"Training at provincial and national levels can be very hard even on the fittest and strongest of bodies. Bumps, bruises, sprains, and fatigue have all been my experience. Microhydrin gives me quick recovery from injury plus the endurance to participate daily in the sport I love."*

Tom Smale  
Provincial Super-Pipe Snowboard Champion

*"Most people would classify my workouts as extreme. I spend 8 -12 hours a day in the gym and the dojo. I find no other product enhances my endurance, stamina, energy, and, most importantly, my recovery time like Microhydrin. I need to be in top form everyday. Microhydrin helps my body do in hours what used to take days!"*

Master Kinney  
5th Degree Blackbelt, Teacher and Trainer

**Alkalize for your health**

Poor diets and a stressful life have caused our bodies to shift from a healthy alkaline pH to an acid pH, creating chronic acidosis. Many experts believe this to be a major contributing factor to almost every health challenge.

A clinical study showed that subjects taking 4 Microhydrin daily for 3 weeks increased the pH values of saliva and urine to a healthier alkaline state. One capsule of Microhydrin in 8 oz of water has an alkaline pH of 9.5, which is critical for balancing our acidic lifestyles.

Microhydrin® Plus™  
anti-aging • detoxification

exclusively from  
RBC LIFE SCIENCES®

### You can:

- Harness the energy promoting power of Microhydrin® in an advanced antioxidant formula
- Benefit from a wide range of anti-aging ingredients with only one product
- Protect your cells from destructive free radical damage better than ever before

with **Microhydrin® Plus™!**

### Cell HealthFood™

In the last decade, research has demonstrated the incredible need for antioxidants to slow the aging process and protect our health. Our Founder, Clinton Howard, set out to create the most powerful broad-spectrum antioxidant. He did exactly that with the development of Microhydrin Plus, a research-backed antioxidant that offers unparalleled cellular protection.

The next generation in Cell HealthFood™ is Microhydrin Plus. It combines the most powerful antioxidant available – Microhydrin® – with eight other powerful antioxidants. This gives you the ultimate broad-spectrum protection from various types of free radical damage.

### The “Plus” is:

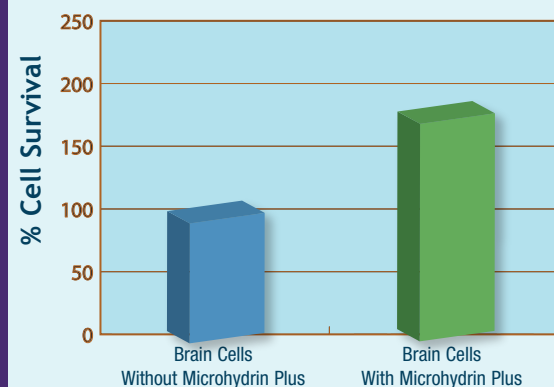

- Alpha Lipoic Acid
- Green Tea
- Selenium
- Quercitin
- Vitamin C
- N-acetyl L-cysteine
- Milk Thistle
- Niacinamide

### STRONG SCIENTIFIC EVIDENCE

Microhydrin® Plus™ research shows:

- All the benefits of Microhydrin **PLUS**
- Powerful broad-spectrum antioxidant protection
- Greater survival of brain cells when exposed to oxidation
- Powerful daily detoxification benefits

Microhydrin Plus Added to Cultured Human Brain Cells Increases Their Growth & Survival

When brain cells were treated with Microhydrin Plus, their growth and survival increased 80% over untreated brain cells when both groups were exposed to severe free radical damage.

*“For 20 years I have conducted research on antioxidants. To fight different free radicals, you need different antioxidants as in Microhydrin Plus. For my personal use, each day I take two Microhydrin and two Microhydrin Plus.”*

- Dennis Higgins, MD  
Antioxidant Researcher

*“I have been taking about 15-20 supplements each day for about 32 years. If you take the sum total of everything I’ve learned about supplements, I can honestly say that if I could only take one daily supplement, it would clearly be Microhydrin Plus.”*

- Frank Kerestesy  
Loyal Customer

*“We are exposed every day to potentially dangerous toxins. Our bodies are constantly bombarded by the free radicals that are caused by these toxins. Since there are so many different types of free radicals today, it takes a lot of different antioxidants to offset their negative effects. Everybody can benefit from the broad-spectrum antioxidant protection found in Microhydrin Plus.”*

- Jeff Bennert, Ph.D. N.D.  
Board Certified Naturopathic Physician

### What are antioxidants?

Antioxidants are compounds that stop free radicals from damaging your cells. Stopping this damage is the key to keeping your cells healthy so you can enjoy an active, vibrant life. Microhydrin Plus is formulated to help you slow the aging process and support your immunity with research-backed, broad-spectrum antioxidant protection.
